

MIA Solutions® Template Exporter

Export data into predefined templates

MIA Template Exporter allows the Spotfire users to define own templates with all aspects of the Spotfire Analysis (charts, properties, etc.) by MIA Template Manager with WYSIWYG editor. Export the templates with new data into different formats (e.g. pdf, html, pptx).

Setup the template only once and allow TIBCO Spotfire Automation Services™ generate the predefined report on regular basis. With additional MIA Attachment Sender plugin send automatically generated reports to predefined users as an E-Mail Attachment.

User Benefits

- **Regular reporting with predefined templates**
- **Shorten time to generate Reports**
- **Automatic sending of exported reports**
- **No changes to current dxp implementations**
- **Easy definition of templates by MIA Template Manager**
- **“Report bursting” – generating personalized reports**
