

## TIBCO Spotfire Idea

Within the Admin console you can choose how many items will be shown on a page, like Scheduling & Routing:

The image shows two screenshots of the TIBCO Spotfire Admin console 'Rules' page. Both screenshots show a search bar, a 'Display' dropdown set to 'All', and a set of action buttons (Disable, Delete, Reload, Create rule, Edit default routing rule, Refresh). The top screenshot shows a list of rules with 22 items, and the bottom screenshot shows a list of rules with 5 items. The pagination shows 'Rows per page' and '1 of 22' or '1 of 5'.

For disabling or enabling (or deleting/... on other pages of the Admin console) it would be handy to be able to choose whether you want to disable/enable ALL or only the items on the page that is shown.

Right now, there is only one check box at the top to select ALL:

<input type="checkbox"/> Priority ^	<input checked="" type="checkbox"/> Priority ^
<input type="checkbox"/> 0	<input checked="" type="checkbox"/> 0
<input type="checkbox"/> 1	<input checked="" type="checkbox"/> 1
<input type="checkbox"/> 2	<input checked="" type="checkbox"/> 2
<input type="checkbox"/> 3	<input checked="" type="checkbox"/> 3
<input type="checkbox"/> 4	<input checked="" type="checkbox"/> 4
<input type="checkbox"/> 5	<input checked="" type="checkbox"/> 5

Is it possible to add a second checkbox, to select only the items on the page that is shown?
